

CENTRO 3

MINIMAL ENVIRONMENTAL IMPACT, MAXIMUM PERFORMANCE

It's a work tool built for one of the biggest challenges the world faces today: to develop sustainable transport that makes minimal environmental impact, while at the same time providing the end customer with a high level of service.

With the skill and experience that years in the bike industry have given us, this bike proves that we still like to be challenged. This model provides minimal environmental impact while smoothly distributing goods in the inner city.

The Centro-3 is easily adapted to the customer's requirements, with the possibility of adding custom cabinets or platform, which take up to 1.4 m³.

Among the many advantages of the bicycle as a tool is a low cost, a smooth appearance in traffic and adds no fossil fuels. But way more smiles.

This is Centro-3.

A sustainable option in many ways, manufactured in Sweden in our factory, where we take care of design, building and painting of the bike and Probox. The frame is produced 300 meters from our factory and the Probox-design is printed nearby. A sustainable production chain for a sustainable product.

Brakes:	Tektro Hydraulic disc brakes (front and rear)
Gears:	Shimano Nexus 7 sp.
Tyres:	Schwalbe Big ben front, Schwalbe Super motoX rear
Wheels:	Aluminium reinforced 559 mm front wheel, steel reinforced 406 mm back wheel
Frame/Fork:	Unisex, Steelframe 55 cm, steel fork
Motor/Battery:	Shimano steps DU6100, Shimano 504 Wh, charge 80 % - 2,5 h, 100 % - 5 h
Lights:	Front and rear, LED lights connected to e-system
Load capacity:	Volume Probox 1,4 m ³ - 150 kg, front carrier - 20 kg.
Rear Carrier:	Length 120 cm, width 80 cm (Euro pallet)
Measurments:	Length: 270 cm, width: 104 cm, heigth: 170 cm
Weigth:	Only Bike 69 kg
Standard colour:	Silver
Additional colour:	See colour chart
Motor:	Shimano Steps 6100
Produced:	Vansbro, Sweden
Standards:	SS-EN 15194:2017 EPAC (electric bike) CE-2006/42/EG (Machinery directive)

PROBOX

Size:	120 cm x 80 cm x 120 cm. Volume 1,4 m ³
Weight:	Probox 35 kg
Construction:	Aluminium frame with "Sandwich-panels"
Door:	Door to the right or left: 104cm x 88cm, Lock with Key, opens upwards.

CENTRO 3

ACCESSORIES

Centro 3 has a large advertising value when designed with your company logo, but it is difficult to say exactly how large the advertising value will be. Several factors play into this, where the bike is located, how many potential customers are in the area and how the bike is designed. Let's say you are cycling in a larger city with lots of people, then you can compare the bike with a billboard, poster at the local bus station or something similar. With a well-visible logo and the company's colours, the bike becomes more than just a bike - it becomes a moving advertise.

What would an advertising space in your city cost, all year round? Your bike will probably be used all year round or at least for most of the year, also keep in mind that more people will probably turn their heads when you ride down the street, than they are looking at a poster sitting in a bus shelter.

Components and colour can differ from pictures.

PROBOX ADDITIONAL

- Door:** Door back, opens to the side.
- Inside probox:** Shelves- Mount at desired height, removable.
- Max weight shelves:** 25 kg
- Lock:** RFID lock or Key lock
- Print on probox:** Choose your own print/logo on Probox
 - Printing area side door: 1046 mm x 880 mm
 - Printing area rear door : ca 590 mm x 1010 mm
 - Printing area, side: 1070 mm x 1226 mm
 - Printing area, rear: 670 mm x 1226 mm
 - Printing area, front 670 mm x 1226 mm
